Information session of the «Chamber of Innovation»: June 21, from 11 am – 2 pm, Bruxelles

You have an idea for a new product or innovative service? A project to start a new business? The Belgian Chamber of Innovation invites you to its free information session about the services its members have to offer you!!

During these sessions, experts in different domains (Intellectual Property, Business Angels, Start-up, Coaching, Marketing) answer your questions, show you the way, free of charge, whether you are a young project-bearer, an innovative company or a starter.

Free access but prior registration via contact@brussels-innova.com

Brokerage event at SASOfair.com, Split, Croatia, 21 October 2011

Technology Transfer Office of University of Split, Croatian Chamber of Economy and Business Innovation Center of Croatia – BICRO, as a part of the Enterprise Europe Network, are organising a brokerage event that will take place during the international SASO fair. At the national level, SASO presents one of the most significant **civil construction, wood and metal industry, energy and electrical engineering, telecommunications, crafts and small entrepreneurship** fair.

Last year 100,000 visitors attended over 2400 exhibitors on 65,000 m2 of exhibition space.

Brokerage event at SASO 2010 was extremely successful, facilitating 126 meetings between 92 companies from 6 countries (BA, DE, ES, HR, IT, RS). In the post-event survey 94% of participants expressed great satisfaction and willingness to participate again next year. The brokerage event aims at initiating business and technology co-operations such as sales and distribution, license agreements, joint ventures, commercial agreements with technical assistance – or European research projects by offering pre-arranged bilateral company meetings.

AEROSPACE DAYS, Paris-Orly airport, 12-13 October 2011

AEROSPACE DAYS, a global aeronautical/space business event which will give you the opportunity to attend targeted meetings fitted to your requirements. The event will gather a broad range of global competences thanks to the participation of 1,400 decision makers shared out among their respective business fields:

- **October 12th**, 2011: the **aeronautics** industry business meetings
- **October 13th**, 2011: the **space** industry business meetings

AEROSPACE DAYS Paris 2011 is also :

- **12,000 certified business meetings pre-scheduled** between decision makers from more than 50 countries
- **Considerable time-saving** : located in the Orly airport, the event will provide you optimal access conditions
- **A high Return On Investment : registration from 450 €, up to 17 meetings a day**
- **The attendance of aeronautics and space decision makers**: the event takes place in Paris, close to the headquarters of the major actors of the aeronautics/space industries, is organized in association with **ASTECH**, the aeronautics and space cluster in the Paris area, which gathers most of the decision makers of both fields

The event makes sure that the appointment requests have been validated by both partners before scheduling your individual interviews. We ensure that your interlocutors confirm the appointments after reading the detailed description of the requirements and competences that have been outlined during your registration in the enclosed document.

Technology transfer services / All reasonable models of co-operation will be considered

You are an inventor, do you have technology to transfer, do you have new products, technology based on innovations to offer; do you need new technologies, do you need technical assistance in technology transfer...

Please contact IPA CIFATT Craiova, e_mail: office@ipacv.ro ; web site: www.ipacv.ro.

SMEs

Technology Offer

A Romanian author of 3 inventions, patented with huge impact in all areas of thermal engines, including those with the pistons, as well as of all existing electrical co-generation systems and are looking for investor-funding source

They have the honor to propose three offers of inventions, with a high degree of industrial applications, into energy field with a special impact in all areas of thermal engines, including of those with pistons, but also of all existing power cogeneration systems:

1. "ENGINE ROTATING INTERNAL COMBUSTION" type RADAN patented in Romania and France.
2. "HYDROMOTORS G.A" type RADU, which is in patent pending at OSIM, Romania.
3. "MAGNETOMOTORS RADU" , which is in patent pending at OSIM, Romania.

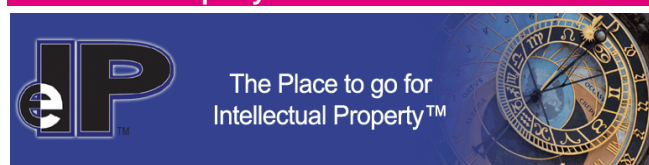

Looking for investors - financiers for any invention.

If the potential investor wants me to go to his company for a meeting, to discuss in detail about inventions , first, we have to make a contract that will provide the secrecy of discussion and the sketches presented, with damages clauses. Also, in this contract we will establish the fundamentals of the future collaboration between me and investor.

If I should go at the investor's company, he has to provide in advance my transport costs, hotel accommodation of at least 4 stars and a daily allowance.

A Single Market for Intellectual Property Rights; Boosting creativity and innovation to provide economic growth, high quality jobs and first class products and services in Europe

Putting in place a seamless, integrated Single Market for Intellectual Property Rights is one of the most concrete ways to release the potential of EU inventors, creators, empower them to turn ideas into high quality jobs, economic growth.

This Communication presents the Commission's overall strategic vision for delivering the true Single Market for intellectual property that is currently lacking in EU – a EU IPR regime that is fit for tomorrow's new economy, rewarding creative/inventive efforts, generating incentives for EU-based innovation, allowing cultural diversity to thrive by offering additional outlets for content in an open, competitive market.

Research / Innovation and Entrepreneurship

Innovation Union Competitiveness Report 2011

The EU's innovation performance needs major improvements in many areas if the Europe 2020 strategy is to deliver smart sustainable growth, concludes the EC's 2011 Innovation Union Competitiveness Report. EU needs "smarter" investment in both public/private research & development, not only does this boost growth in the medium-term, it also has a counter-cyclical effect in times of crisis. More research cooperation within the EU, internationally is needed, along with better use of research results, including through a stronger IP regime. Education systems need to be adapted to business innovation needs. Innovative and fast-growing SME's need more encouragement. Key findings from the report:

- Europe needs to accelerate investment in research and innovation.
- In times of economic crisis, accumulated investment in research and innovation has a counter-cyclical effect.
- Investments in innovation have to be "smarter". The most successful innovation performers have focused their investments in a smart specialisation strategy combining supply-side policies (such as public subsidies to higher education, business R&D, venture capital, scientific & technological infrastructures), demand-side ones (such as public procurement of innovative products, performance-based standardisation, procompetitive product market regulations).
- The development of highly-skilled people needs to be matched with the needs of business.
- Integration and internationalisation of research increases returns on investments.
- Weak framework conditions prevent knowledge being transformed into marketable products/services. EU is losing ground in the exploitation of research results.
- Europe has strong potential in technological inventions tackling societal challenges.
- We need more innovative and fast-growing SMEs. The EU needs to catch up with the US in the research intensity of high-tech, medium high-tech industries. In other words, it needs structural change both within/between sectors.

More... http://ec.europa.eu/research/innovation-union/index_en.cfm?section=competitiveness-report&year=2011

Partner Search

Occam, a Portuguese SME is looking for cities and SMEs

FleetPRO will develop work towards the empowerment of fleet owners/managers to promote green fleet procurement.

Its main goals are the following:

- Promote the take up of European policies on green fleet procurement (e.g. Clean Vehicle Directive);
- Promote a more rational composition of fleets through the optimization of procurement processes by introducing operational criteria on the selection model.

FleetPRO will target both public and private organizations that detain light vehicles for their daily operations, even though their core business isn't focused on transport services. The consortium will have representations of the main stakeholders

targeted by the action and also foresees the development of at least 3 pilots in order to demonstrate, fine tune and validate the procurement methodology. The consortium is looking for cities with municipal fleets and for SMEs with medium/large fleets (between 50-250 light vehicles) from EU countries.

Contact Mrs Sofia Taborda, Tel: +351 918 815 559, www.occam.pt ; www.facebook.com/occam.fb

New campaign to collect descriptions of competences in software services for a FP7-ICT partner search engine

The FP7-ICT project SPRERS (www.sprers.eu) intends to promote the competences in software services of the teams from new member states of European Community.

SPRERS offers a search engine for project partners from new member states especially designed for the next Call 8 of FP7-ICT, Objective 1.2 "Cloud Computing, Internet of Services and Advanced Software Engineering".

If you are interested in participating to the European Programme FP7-ICT in the field of software services, raising your team visibility, as chances to join a consortium, please fulfill, until June 15th, the questionnaire available at <http://sprers.eu/competences/frmCompetences/OpenForm>.

If you have questions, please contact the project coordinator, Prof. Dr. Dana Petcu at petcu@info.uvt.ro.

ECAP - Online FORUM

You can meet and keep in contact, in order to share best practices and to find potential partners for your project ideas. Particularly now, with the open **LIFE+ 2011 Call**, the upcoming **CIP/Eco-Innovation Call**, the online FORUM represents an ideal "virtual space" where seeking for potential project partners (specific "**Partner search**" section of the Forum).

Feel free to publish in the "**Events**" section any environment/SME related event you may be organising or attending.

Keep monitoring the **ECAP website** for updated information: http://ec.europa.eu/environment/sme/index_en.htm

Elsevier Foundation Invites Grant Proposals for Innovative Libraries Program

The New York City-based [Elsevier Foundation \(http://www.elsevierfoundation.org\)](http://www.elsevierfoundation.org), the philanthropic arm of scientific and medical publisher [Elsevier](#), is seeking new grant proposals for its 2011 Innovative Libraries program. The foundation supports the efforts of libraries to enhance the quality of life by advancing knowledge in science, the social sciences, technology, and medicine (STM).

The foundation provides grants to libraries and supporting organizations for the following: programs to enhance library infrastructure, technology, or information services in ways that significantly expand their ability to make STM information available to those who need it — researchers, clinicians, students, policy makers, and the wider public; programs that expand library information resources in the developing world through digitization or preservation of information that advances science, health, the environment, and indigenous knowledge; training and education programs for library staff, students, or researchers, contributing to sustainable improvements in the library's capacity to provide STM information in the developing world; and partnerships between libraries in developing countries and institutions to provide technical assistance or training (developed country partner organizations include libraries, learned societies, universities, intergovernmental organizations, and other nonprofit organizations).

Grants will provide one-, two-, and three-year awards of between \$5,000 and \$50,000 per year. Requests for hardware will only be considered if they are part of a comprehensive project approach integrating diverse elements such as training or research. Grants are awarded for specific projects rather than operating support.

Applications will be accepted online from July 1, 2011, through **September 15, 2011**.

Policy

Commission makes Europa website accessible for Internet Protocol version 6 users

On World IPv6 Day the European Commission is making its Europa website accessible for Internet Protocol version 6 (IPv6) users (as well as IPv4 users). The Internet operates by transferring data in small packets that are independently routed across networks, as specified by an international communications protocol known as the Internet Protocol. In 1984 over 4 billion addresses were made available on Internet Protocol version 4 (IPv4) but due to increasing demand for new Internet services, the last remaining IPv4 address was assigned in February 2011.

The uptake of IPv6 will make available a practically unlimited amount of Internet addresses to support the explosive growth of new services in the future. By making its website IPv6 accessible, the European Commission is setting an example and hopes to encourage other public sectors to persuade European companies and manufacturers to make their new smart devices and servers IPv6 compatible. Deploying IPv6 is a key action under the Digital Agenda for EU.

Smart Accessibility Awards 14 June 2011 Brussels, Belgium

The European Disability Forum (EDF), AGE Platform Europe (AGE) and the Vodafone Foundation are jointly launching "Smart Accessibility Awards". Researchers and developers are asked to create mobile applications to improve the lives of

ageing users and users with disabilities. The competition will be held in 4 categories: social participation, independent living, mobility and well-being. During this launch event the debate will focus on how the smartphone platforms can enable low cost and rapid innovation and ensure the widespread distribution of new functionalities to users who may otherwise be excluded from the benefits of today's digital society.
