Biomedica Matchmaking, Brokerage Events, 7-8 April 2011, Eindhoven, the Netherlands

The Biomedica Summit fosters cooperation within institutes and enterprises to improve product innovations. It is a multidisciplinary event in which science meets business, will inform you about the latest progress in R&D. Biomedica Summit focus topics are:

- Biomaterials, Targeted drug delivery, Regenerative medicine
- Advanced development for (bio) pharmaceuticals/nutraceuticals
- Cardiovascular diseases and Central Nervous System diseases
- Medical devices for sustainable health care
- Imaging: From diagnosis to guided therapy
- Sensors&monitoring: From diagnosis to disease management

A multidisciplinary event in which science meets business, will inform you about the latest progress in R&D. In cooperation with the organisers, and their Enterprise Europe Network partners, Syntens and ZENIT will organise a matchmaking event, making it even easier for participants to meet their future R&D or technological partners.

6th Taste Nutrition Health International Congress, Brokerage Events, 22-23 March 2011, Dijon, France

The Taste Nutrition Health BUSINESS MEETINGS open a unique opportunity to exchange with other congress participants. This event targets agrofood industries, laboratories, technical centres dealing with food and nutrition. The highlight of this event compared to others events of similar topics is the sensory approach (taste, flavour, texturation...). Any organisation (industry, public or private research lab, technical centre, French or not), having a technological or know-how offer or request or even seeking for partners is therefore welcomed to join the business meetings. The brokerage event is organised within the framework of the 6th International Taste-Nutrition-Health Congress in Dijon. Over 370 meetings were organized during the last edition.

Symposium on Transatlantic EU-U.S. Cooperation on Innovation and Technology Transfer

The purpose of the EU-U.S. Symposium on Innovation & Technology Transfer is to increase mutual understanding, raise awareness on open innovation processes, structure, operations of the technology transfer, innovation systems in EU/US. The Symposium will bring together technology transfer firms, major research organisations, technology and other related experts to discuss the open innovation paradigm, Innovation Union, its implications on EU-U.S. cooperation; development management methods of open innovation by large companies, R&D Centers, Intermediaries; open innovation's implications on IP, Global Networks, national and regional policies, as well as good practice examples on selected topics of mutual interest including recommendations for tackling challenges to trans-Atlantic cooperation.

The Symposium is organised by the BILAT-USA Project, which aims to improve the awareness towards EU-U.S. Science & Technology cooperation through setting up a sustainable, knowledge based, bi-regional dialogue platform between S&T key players, stakeholders from the EU-Member States, Associated countries and the U.S.

Partnering Forum New ways to promote services innovation in EU: the role of the structural funds, Warsaw, 27-28 January 2011

TAKE IT UP kindly invites you to the seminar "New ways to promote services innovation in EU: the role of the Structural Funds". The seminar is organised by the Europe INNOVA KIS Innovation Platform, the EC's DG for Enterprise and Industry initiative aiming at accelerating the take-up of services innovation in EU.

The KIS Partnering Forum is expected to bring together around 150 participants from relevant national, regional and local authorities and public agencies responsible for the promotion or support of innovation and having a specific interest in applying Structural Funds aid to the services sector. The KIS Partnering Forum will discuss novel and groundbreaking approaches to supporting service innovation, which is of particular interest for programme managers and innovation and development agencies who are interested in stimulating regional development through new economic activities.

The seminar is planned as a 1,5 day event and it will be divided into four sessions:

Session 1: Why invest in services innovation at the regional level? The rationale;

Session 2: What is being done? Supporting new service concepts through Structural Funds – practical examples;

Session 3: How is it being done? Practical experiences of accessing Structural Funds to support new service concepts;

Session 4: The next frontier - policies and initiatives of the future.

SMEs

Business Offer

[ES150205-03-20101228055](#)

Spanish company specialized in manufacturing furniture accessories (knobs and handles), is looking for trade intermediaries (agents, distributors or representative) in Europe.

[SI150335-05-20101228088](#)

Slovene company engaged in production of radiators and central heating boilers is looking for trade intermediary services agent, representative, and distributor.

[HR225509-01-20101228100](#)

Croatian leading and largest company in the field of presentation of healthy sleep products, manufacturing of mattresses, textile production, manufacture of clothing, finishing and dyeing of fur, etc., is looking for and offering trade intermediary, looking for franchise partners joint venture and reciprocal production. The company is offering transport/logistic services and subcontracting

[BG150325-08-20101228108](#)

Bulgarian company specialized in manufacturing of industrial castings from gray and nodular cast iron is offering its services as a subcontractor. The company is looking also for partner for reciprocal production and trade intermediaries.

[RU000003-03-20101228117](#)

Russian company specialized in supplies of medical equipment, medical products, consumables is looking for partners for joint ventures, reciprocal production, franchise. The company is ready to be a distributor.

[MK150264-03-20101227014](#)

Macedonian company producer of fermented pollen and naturally dried fruits for dietary supplement is looking for Trade intermediary(agent,distributor,representative).This company has family tradition and old recipe of making fermented pollen,so called bee bread it could be produced as liquid or in tabs. Use of these supplementary products has positive effects on the human body in sense of energy rising and building stable immune system. The company also offers it self as a franchise partner to companies already active in this sector.

[RS225341-01-20101227030](#)

Serbian company dealing with telecommunication electronics and specialized for production of metal furniture, metal packaging, safety equipment for railways is offering trade intermediary services and looking for and offering joint venture.

Business Request

[NO150390-01-20101123052](#)

Norwegian company is looking for agents for its waste management product in Europe. The product is a state of the art

and complete pre-treatment system for organic waste.

LU225381-01-20101104060

Luxembourg company, active as an engineering company in the field of bioenergy in the areas such as planning, commissioning and operating of biogas plants, offers its services as subcontractor.

LU225381-01-20101103041

Luxembourg company, specialised in the production and delivery of electric power, is looking for a reciprocal production cooperation.

TR150285-01-20101012019

A Turkish company specialised in IPP (Independent Power Production) model energy production, co-generation and tri-generation types of power production, besides related services and operations is looking for joint venture agreements.

DE150213-03-20100920021

A German company specialising in solar systems (photovoltaic solar power systems/plants) seeks joint venture partners for the joint management and execution of projects within this field mainly in the region of Lorraine, France.

FR150403-01-20100719065

French company provides solutions for air indoor quality problems. Its expertise concerns measurement, treatment and training.

KR000005-02-20100507001

A Korean company specializing in smart grid power lines and LED lights is looking for a sales and distribution partner for their products. The potential partners are building maintenance companies that can install the Korean company's smart grid power line systems, or distributors handling electronic and interior lighting could be partners in that they can sell the Korean company's LED lights.

ES150205-02-20100421011

Catalan (Spain) engineering specialized in biogas energy and bio-fuel is interested in becoming subcontractor. They also offer joint-venture or reciprocal production agreements.

Technology Offers

Innovative grip-box as a component of beginners' tennis racket

An Italian sports company, located in the Nord-West of Italy, has designed an innovative grip-box suitable to be included in beginners' tennis rackets to help practice this sport correctly and avoid possible physical problems. The main objective of that innovation is to learn how to play tennis properly in a very easy way.

New type of communal vehicle – WITH AXIAL GARBAGE COMPRESSING – PUSHDOWN PLATE V16

Small Serbian company located in city of Nis offers innovative models of specialized & communal vehicles in the field of automotive industry. The standard offer is based on a completely new construction of specialized & communal vehicles that have been developed according to appropriate standards.

Stabilized direct high voltage feeder for industrial purposes

A small Polish company from electro-technical sector offers stabilized direct high voltage feeders. The innovative devices are computer controlled and may be used in various industrial purposes e.

New home automation system – smart home

Serbian SME has developed a completely new brand. This offer is a system that integrates home automation and logical television.

Method/device for improvement of the microclimate in the space between the body and the clothing

A pair of Polish inventors of multi-year research background developed a method and a device for the improvement of the microclimate around human body. The aim of the invention is to control the microclimate on the surface of a human body in various conditions.

Technology of natural interfaces to facilitate the accessibility and the use of intelligent technological tools

A University spin-off has developed a novel intuitive human-computer interaction technology able to take in account the users and their environment. The technology can be implemented on different types of applications: wellness; game and leisure; multimedia... The main advantage is to deliver the most appropriate action to a specific behaviour.

Technology Request

Technology and equipment for small plastic water cup production, filling and sealing

A bottling plant of mineral still water from Northwest Spain that is producing superior quality bottled water is looking for an innovative production line able to make small plastic cups, fill them with water and seal them with an aluminium sheet. The company would like to sign a commercial agreement with technical assistance.

eLearning technology platform supporting and integrating CAD/modeling activities

An Italian company holding a unique know-how in apparel modeling supplies simple web-based remote learning and consultancy services to clients of the fashion sector. It is looking for a suitable eLearning platform with effective features to engineer and support learning modules for modeling (also CAD-based).

A material or a manufacturing method of a better conductivity on insulation boards

A Turkish company which is located in Mersin is looking for universities, technological partners/research institutes or companies to develop/transfer technologies of a material or a manufacturing method of a better conductivity on insulation boards. The technology may consist of chemicals to reduce the lambda value (K) on insulation boards and also reduce the manufacturing costs.

PS - FP7-PEOPLE-2011-ITN - Looking for SME interested in development of rheological test with application for drug screening and diagnosis

4 Physics/Biology European R&D centers (France, Germany, Italy, and England) associate to apply FP7_ITN call. Their competence is the vision of cells and tissues as physical entities.

Mobile real-time intelligence technology for law enforcement

A Dutch regional law enforcement organization is interested in technology that can be used to build a real-time intelligence infrastructure. The technology should enable to supply employees working in the field with real time intelligence.

Software application for risk potential analysis of individual human beings

A Dutch high profile logistics & distribution organization is seeking software technology that can automatically and autonomously make a risk assessment or risk profile of individuals. The organisation is interested in contacts R&D institutes and specialised companies in the framework of technical cooperation and commercial agreements with technical assistance.

Ultra High-Precision 3D Profilometer for Large Freeform Surfaces

A large US company is looking for proposals for ultra high-precision 3D profilometer for freeform surface analysis of large scale plastic optics and their molding tool. Of special interest is a fully integrated profilometer system with 3D metrology head technology.

Development of dental consumables such as glass ionomer cement and tooth filling products

A French manufacturer in dental products is looking for a technical partner to develop a range of dental consumable products. The French SME wants to maintain its competitive advantage through the development of new products such as a glass ionomer cement and a last generation dental bonding for composite.

Planar Alignment of Cells onto a Compact Surface

A large US company is looking for proposals for technology to align large amount of cells in liquid, without arranging one above the other, onto a surface. The cells should be expanded with a minimum loss and aligned densely onto a compact surface.

Innovative technologies for waste treatment (water, sludge)

An Austrian company specialised in plant engineering of waste water and drinking water applications is looking for innovative technologies to broaden its product range. Technologies of interest are in the field of waste water and sewage sludge treatment and heat recovery.

Production line for production of plastic bags.

A Slovak SME active in the plastic industry needs specialized innovative production line for the production of plastic bags through license agreement with technological assistance.

Research / Innovation and Entrepreneurship

ICT Proposers' Day for networking and consortium building, Budapest, Hungary, 19-20 May 2011

Information will be given about calls 8 and 9 of the FP7 ICT Work Programme and the 2012 "ICT for the fully electric vehicle" call, which will open in the summer of 2011. Newcomers will also obtain information on funding opportunities provided by the European research programmes.

Partner Search

FP7 Partner Search Facility Launched in Ukraine

The EU National and Thematic Contact Points that the FP7 National Information Point-Ukraine (FP7 NIP-Ukraine) and the EU-funded project "Joint Support Office to Ukraine's Integration to the European Research Area" (JSO-ERA project) have launched the joint activity related to providing a practical support to Partner Search upon request of: Ukrainian organisations willing to participate in FP7, and EU organisations looking for potential partners in Ukraine. Please note that using the best efforts approach and synergy of the FP7 NIP-Ukraine and JSO-ERA project, we are ready to facilitate the partner search process in order to establish a long-lasting and fruitful FP7 cooperation between Ukrainian and European research organisations.

The **FP7 Partner Search Form** is available now in the Partner Search section on the JSO-ERA web-site, where the recommendations to the Ukrainian and EU organisations seeking for support in Partner Search can be found in English at: <http://www.js-era.org.ua/en/universaltexpages/searchpartners/index.html>

Partner search request from Turkey

Acronyme and title: Location Based Multimedia Messaging Platform Enabler. Keywords: Location, messaging, mobile application, LBS, GPS, Geo-tagging, Distributed System, Platform. Type of Project/Funding scheme : Eureka Program

The development of location-based projects is still too complex for many existing companies: they are required to rely on either the services provided by the operator or the capabilities offered by different handset platforms.

With this project we propose to develop a system consisting of a server platform and multiple mobile client components. This system will provide an easy to use API that will allow third party developer to add location based features to their existing services or build completely new ones, therefor growing the location based development eco-system.

Partner Search for the Project: Earth Observation & ENVironmental modelling for the mitigation of HEAlth risks

Call announcement: EO2HEAVEN is a large-scale integrating project co-funded by the European Commission under the 7th Framework Programme, theme 6, Environment (including Climate Change). The project EO2HEAVEN requires the participation of a new project partner (additional beneficiary) to address the following objectives:

1. To provide advice/guidance on the public health requirements for Earth observations in the design of the three project case studies,
2. To contribute to the dissemination and transfer of project results,
3. To support, in close cooperation with the GEO Secretariat, the GEOSS HE-09-01/02 Pilot activity,
4. To assess and gather the requirements for environmental information for use in public health decision making,
5. To contribute to the methodological study of links between extracted environmental parameters and collected health data in close collaboration with scenario leaders,
6. To contribute to the final reporting and recommendations for the future implementation of integrated health, environmental monitoring systems.

Deadline: The call closes on 23 February 2011 at 17:00 (Brussels local time)

Expected duration of participation in project: May 2011-January 2013; Total EC funding available for the new beneficiary is up to EURO 150, 000; **Call identifier:** 244100-EO2HEAVEN-Call-2010

Language in which proposal should be submitted: English

Mail address for further information: 244100-EO2HEAVEN-Call-2010@iosb.fraunhofer.de

Responsible organization: Fraunhofer Institute IOSB, Karlsruhe, Germany

Human Frontier Science Program (HFSP) - Research Grants 2012

Research grants are provided for teams of scientists from different countries who wish to combine their expertise in innovative approaches to questions that could not be answered by individual laboratories.

Emphasis is placed on novel collaborations that bring together scientists preferably from different disciplines (e.g. from chemistry, physics, computer science, engineering) to focus on problems in the life sciences.

The research teams must be international. The principal applicant must be from one of the [eligible countries](#). However, other participating scientists and laboratories may be situated anywhere in the world.

Applicants must submit a letter of intent to apply for a research grant via the HFSP web site with a deadline at the end of March, and after review, selected teams will be invited to submit a full application.

Two types of Research Grant are available: Young Investigators' Grants and Program Grants.

Young Investigators' Grants are awarded to teams of researchers, all of whom are within the first five years after obtaining an independent laboratory (e.g. Assistant Professor, Lecturer or equivalent). Applications for Young Investigators' Grants will be reviewed in competition with each other independently of applications for Program Grants.

Program Grants are awarded to teams of independent researchers at any stage of their careers. The research team is expected to develop new lines of research through the collaboration. Up to \$450,000 per grant per year may be applied for. Applications including independent investigators early in their careers are encouraged.

Call for Proposals: EU-US Atlantis Program

In the context of the European Union - US Framework for Co-operation in Higher Education and Vocational Education and Training (EU-US ATLANTIS Programme) a new call for proposals has been launched to fund innovative projects which are designed to develop and implement double or joint "transatlantic degrees" for students in the EU and U.S. It may also support projects to promote other forms of EU-U.S. cooperation in higher education and vocational training, including mobility projects and policy-oriented measures.

The funded activities, such as the development of curricula, joint study programmes, exchanges and study abroad with provision for mutual credit recognition and language and cultural preparation, will benefit to higher education students, vocational education and training learners and teachers/trainers/administrative staff.

The main focus of activities must be on transatlantic rather than intra-European or intra-American interactions.

Submission of grant requests under this call is open to higher education /vocational education/training institutions. Each project must have one lead institution in the EU and one lead institution in the US, responsible for submitting the common proposal and for the management of the project. These lead institutions must be higher education or training institutions

ESF report: Europe can be marine biotech leader

The Marine Board of the European Science Foundation (ESF) says in its latest report that Europe can take the leading role in marine biotechnology by 2020. Latest data show that the marine biotechnology market is valued at EUR 2.8 billion, and has the potential to grow up to 12% each year if industry and academia cooperate.

6th Workshop on reconfigurable & communication-centric systems-on-chip, 20-22 June 2011, Montpellier, France

ReCoSoC is an informal workshop aiming to encourage technical/scientific exchanges between senior academics, young researchers in the area of reconfigurable/communication-centric systems-on-chip. Registration fees are kept low, the participation of doctoral students is stimulated aiming to obtain sponsoring from companies/funding agencies.

The 19th European Biomass Conference & Exhibition, EU BC&E, 6-10 June 2011, Berlin, Germany

This event, the leading platform for the world's biomass specialists, is hosting more than 800 presentations in plenary, oral and visual sessions. It receives institutional support from BMU, the German Federal Ministry for the Environment, Nature Conservation and Nuclear Safety, in the frame of the programme 'Research and Development for the Optimization of Energetic use of Biomass' (www.energetische-biomassenutzung.de). The EU BC&E offers the best platform to share and compare results with similar targeted research and development results of EU countries and beyond. The key subjects of the 19th European Biomass Conference and Exhibition cover the five subjects of current global interest:

- Biomass Resources
- Biomass Conversion Technologies for Heating, Electricity and Chemicals
- Processes for Fuels from Biomass
- Technology Deployment and Industrial Demonstration
- Biomass Policies, Markets and Sustainability

Presenters and participants will be able to follow the latest developments in these subjects and to exchange personal experiences and views. Call for Papers open! Deadline 31 January 2011

The Brussels Carbon Capture and Storage Summit 2011, 26 January 2011, Brussels

The Summit 2011 will be one of the first opportunities to discuss the future of CCS financing and technologies following December's climate negotiations in Cancun. With those negotiations now over and bringing some significant issues to the fore, how should Europe and the CCS community respond?

Calendar of training courses in nanoscience and electronics

How X-Rays can support the development of MEMS	16-17.02.2011	Neuchâtel (CH)
RF MEMS and NEMS	18.02.2011	Lausanne (CH)
Carbon Nanostructures with Manifold Applications	25.02.2011	Neuchâtel (CH)

Smart Materials in Robotics and Microtechnology	3-4.03.2011	Neuchâtel (CH)
Hermetic Packaging Design of MEMS	7-8.03.2011	Lausanne (CH)
Reliability and Test	7-8.03.2011	Neuchâtel (CH)
Micro Assembly using Surface Tension	9.03.2011	Neuchâtel (CH)
Labs-on-Chip Technologies: Basics and Applications	10-11.03.2011	Stockholm (Sw)
Next-generation lithography with focused electron beams - NEW!	22.03.2011	Dübendorf (CH)
Conception des guidages flexibles	25.03.2011	Neuchâtel (CH)
Tolérancement des assemblages: revoir la conception	30.03.2011	Neuchâtel (CH)
Comment synchroniser GPAO et R&D ?	03.05.2011	Neuchâtel (CH)
Design et réalité industrielle	04.05.2011	Neuchâtel (CH)

The IEEE-SSCS Italian Chapter organizes the courses "Topics on Microelectronics"

Course 2011/1 - 25-27 January 2011

Osama Khouri, (Elpidia) "Design, architecture of Flash Memories", Mario Paparo (STMicroelectronics) "Silicon & System-in-package technologies for RF transmission modules", Roberto Guerrieri (Univ. Bologna) "Systems & Microsystems for healthcare applications", Sebastien Cliquennois (STEricsson) "Digital Control of Integrated SMPS for Portable Applications", Catherine Dehollain (EPFL) "Design & optimization of remotely powered RFID systems/sensor nodes"

Course 2011/2 - 4-6 May 2011

Andrea Fornasari (National) "Dynamic Offset Compensation Techniques: from theory to implementation", Andrea Mazzanti (Univ. Pavia) "CMOS integrated circuits for mm-Wave applications", David Stoppa (FBK) "Single-Photon Avalanche Diodes Image Sensors in CMOS Technologies", Carlo Fiocchi (AustriaMicroSystems) "Engineering aspects in DC-DC converters design", Enrico Sentieri (STMicroelectronics) "Accelerometer Sensor interface for seismic application"

EU Company Law & Tax Law: Cross-Border Mobility of Companies in Practice, 14-15 Feb 2011, Luxembourg

The Treaty on the Functioning of the EU (TFEU) grants EU undertakings a fundamental right of establishment. This freedom covers e.g. transfers of companies' seats between different Member States of the EU (MS), cross-border mergers, establishment of subsidiaries, setting up of branches in other MS, however, subject to certain legal limitations.

This seminar aims to provide the participants with a hands-on, practical understanding of the EU law framework applicable to company mobility within the European Union (EU). This will be achieved not only by analysing applicable primary and secondary European law (but discarding inapplicable legal instruments in the pipeline such as EU Private Company) and the CJEU case law, but also, where relevant, examples of national law provisions and real life examples and case studies. Moreover, the facilitators and participants alike will try to establish an extensive list of available strategies for cross-border mobility enabling the lacunas of the current legal framework to be overcome.
