Symposium on Transatlantic EU-U.S. Cooperation on Innovation and Technology Transfer

The purpose of the EU-U.S. Symposium on Innovation & Technology Transfer is to increase mutual understanding, raise awareness on open innovation processes, structure, operations of the technology transfer, innovation systems in EU/US.

The Symposium will bring together technology transfer firms, major research organisations, technology and other related experts to discuss the open innovation paradigm, Innovation Union, its implications on EU-U.S. cooperation; development management methods of open innovation by large companies, R&D Centers, Intermediaries; open innovation's implications on IP, Global Networks, national and regional policies, as well as good practice examples on selected topics of mutual interest including recommendations for tackling challenges to trans-Atlantic cooperation.

The Symposium is organised by the BILAT-USA Project, which aims to improve the awareness towards EU-U.S. Science & Technology cooperation through setting up a sustainable, knowledge based, bi-regional dialogue platform between S&T key players, stakeholders from the EU-Member States, Associated countries and the U.S.

Conference on Inspiring Clusters in the Beginning of the New Decade, 30-31 March 2011, Tallinn, Estonia

TCI European regional conference in 2011 will focus on how to improve the Cluster policies both on European, national and regional level and how to achieve excellence in cluster management. The conference will also provide a deeper insight into cluster development in Eastern and Central Europe being the first TCI conference in this region.

In addition to the main programme of the conference, several parallel sessions will be organised based on Open Space Technology, where the participant can define the topics of their core interest and lead the discussion themselves.

As an optional programme visits to Estonian cluster initiatives will be organised for the interested participants. The cluster initiatives, which can be visited are in the field of ICT, Forest and Wood, Wind Energy, Creative Industries and ECO Construction. In addition also cultural programme focused on Tallinn as Culutral Capital of Europe 2011 will be available.

SMEs

Business Offers

HU150225-08-20101229038

A Hungarian company offers its services as a subcontractor for potential partners. They can provide technologies for bio-growing (nutrient supply, composting), recycling and management of organic waste from fertilisers and waste water. They also design and install waste water disposal systems for domestic use. The company also wishes to find partners to apply to proposals and they can provide expert counseling in the fields of agriculture or environment protection.

CZ150242-08-20110107005

A Czech company producing LED lighting is looking for distributors and wholesaler of its products.

SK150236-02-20110107009

A Slovak company specialized in the field of metal and wood working is offering itself as a subcontractor for European companies.

EE150387-01-20110107017

An Estonian company that is acting as regional factory stock for famous producer of sliding systems, doors and gates is looking for distributors for intermediary cooperation. The company is also offering subcontracting services to manufacturing companies.

CZ150242-08-20110106015

A Czech company, which operates an e-shop, is looking for producers of sport cups, medals, glass trophies, golf trophies, statuettes, plaquettes in order to become a trade intermediary.

AT150239-10-20110104019

An Austrian company in the field of clothing and accessories for motorcycle sports is looking for distribution partners.

FR150200-04-20110105007

French company specialised in business and management consultancy activities, professional coaching, organisation engineering, management and strategy for human structures and industrial companies, Lean Manufacturing, is looking for reciprocal commercial, production, subcontracting cooperations. The company offers its services to foreign companies and is open to reciprocal commercial, production, subcontracting and outsourcing activities.

FolioTS, Translation and Multilingual Typesetting/DTP Company located in Pondicherry, India.

We are looking for clients, partners, outsourcers who are in need of our services.

Contact: A. Murugavel, www.foliots.com; contact@foliots.com ; Tel: 91-413-4210456

Business Request

RU000003-03-20101228036

Russian agricultural company specialised in breeding of Vietnamese herbivorous pigs is looking for trade intermediaries, meat processing companies and agricultural companies interested in buying and breeding of this kind of animals.

TR225333-03-20101220074

A Turkish company based in Antalya which produces and distributes wide range of essential oils, spices, organic soap, special health care oils, bay leaf, thyme etc. searches for distributors.

LT150240-02-20101129022

A Lithuanian company specialized in construction and building works, agriculture and other environmental works as well as trade and commercial intermediary is looking for trade intermediary services and offers subcontracting/outsourcing partnership.

LU225381-01-20101104060

Luxembourg company, active as an engineering company in the field of bioenergy in the areas such as planning, commissioning and operating of biogas plants, offers its services as subcontractor.

RS225341-06-20101005004

The company from Serbia, specialized in the production of fish and fish products, is looking for partners for intermediary services, logistics and transport, joint venture and reciprocal production.

BG150325-10-20100827018

Company Information Year Established: 1998 No Employees: 10 to 49 Turnover (in Million Euro): Up to 2 Company Core Activities - Logging - 10000-30000 m3 per year;- Production of non-dried softwood (spruce and Scotch fir) with fixed dimensions: 1. softwood planks with length of 2.5, 3 and 4 m and up to 2 cm thick or 4-7 cm t

IT150360-02-20100826015

An Italian company working in the field of crop physiology has knowledge enabling it to manage in real time the production process of all the cultivated varieties of apple and pear, to maximize fruit size and yield. The company is looking for innovative, technically advanced fruit enterprises as trade intermediaries or for joint venture.

ES150341-06-20100712039

Spanish company with several decades of experience in the agricultural sector regarding onions, potatoes and garlies, was founded in 2002 with the sole aim of offering its best products to the customers. The company is looking for an importer or any kind of distribution to promote and sell its products in Europe.

Technology Offers

Innovative grip-box as a component of beginners' tennis racket

An Italian sports company, located in the Nord-West of Italy, has designed an innovative grip-box suitable to be included in beginners' tennis rackets to help practice this sport correctly and avoid possible physical problems. The main objective of that innovation is to learn how to play tennis properly in a very easy way.

New type of communal vehicle – WITH AXIAL GARBAGE COMPRESSING – PUSHDOWN PLATE V16

Small Serbian company located in city of Nis offers innovative models of specialized & communal vehicles in the field of automotive industry. The standard offer is based on a completely new construction of specialized & communal vehicles that have been developed according to appropriate standards.

Stabilized direct high voltage feeder for industrial purposes

A small Polish company from electro-technical sector offers stabilized direct high voltage feeders. The innovative devices are computer controlled and may be used in various industrial purposes e.

Technology of natural interfaces to facilitate the accessibility and the use of intelligent technological tools

A University spin-off has developed a novel intuitive human-computer interaction technology able to take in account the users and their environment. The technology can be implemented on different types of applications: wellness; game and leisure; multimedia... The main advantage is to deliver the most appropriate action to a specific behaviour.

System/method to obtain standardized climatic indices (temperature, precipitation, etc.) to evaluate climate

A Spanish public research organisation is offering an automated method for acquiring real-time weather information, obtaining standardized climatic indices and dissemination of information generated; using telecommunications technologies in order to serve as an objective reference for the evaluation of weather conditions. Climatic relatic companies are sought for license agreements.

Technology Request

Technology and equipment for small plastic water cup production, filling and sealing

A bottling plant of mineral still water from Northwest Spain that is producing superior quality bottled water is looking for an innovative production line able to make small plastic cups, fill them with water and seal them with an aluminium sheet. The company would like to sign a commercial agreement with technical assistance.

Technologies for cross-multilingual Document Management

An Italian medium-sized ICT company perceives the domain of multilingual document management as a promising specialization of its business line of System Delivery. To this purpose, the company seeks developers of available solutions/capacities in this domain for commercial agreements or technical cooperation.

A material or a manufacturing method of a better conductivity on insulation boards

A Turkish company which is located in Mersin is looking for universities, technological partners/research institutes or companies to develop/transfer technologies of a material or a manufacturing method of a better conductivity on insulation boards. The technology may consist of chemicals to reduce the lambda value (λ) on insulation boards and also reduce the manufacturing costs.

Mobile real-time intelligence technology for law enforcement

A Dutch regional law enforcement organization is interested in technology that can be used to build a real-time intelligence infrastructure. The technology should enable to supply employees working in the field with real time intelligence.

Ultra High-Precision 3D Profilometer for Large Freeform Surfaces

A large US company is looking for proposals for ultra high-precision 3D profilometer for freeform surface analysis of large scale plastic optics and their molding tool. Of special interest is a fully integrated profilometer system with 3D metrology head technology.

Development of dental consumables such as glass ionomer cement and tooth filling products

A French manufacturer in dental products is looking for a technical partner to develop a range of dental consumable products. The French SME wants to maintain its competitive advantage through the development of new products such as a glass ionomer cement and a last generation dental bonding for composite.

Partner search request from Turkey

Acronyme and title: Location Based Multimedia Messaging Platform Enabler. Keywords: Location, messaging, mobile application, LBS, GPS, Geo-tagging, Distributed System, Platform. Type of Project/Funding scheme : Eureka Program
The development of location-based projects is still too complex for many existing companies: they are required to rely on either the services provided by the operator or the capabilities offered by different handset platforms.

With this project we propose to develop a system consisting of a server platform and multiple mobile client components. This system will provide an easy to use API that will allow third party developer to add location based features to their existing services or build completely new ones, therefore growing the location based development eco-system.

Events

The Digital highways, 02 February 2011, European Parliament

Information & communication technology has profoundly changed the economy/our lives in the last 15-20 years. It will continue to do so in the next decade. EU has therefore put these issues at the core of the EU 2020 strategy. The EC has published several documents setting the scene for the measures that need to be adopted in the future - The Digital Agenda communication, the Broadband Strategy, legislative proposals for a first five-year Radio Spectrum Policy Programme, for the extension of the mandate of the European Network and Information Security Agency (ENISA).

This high-level seminar aims at giving an overview of the key challenges in implementing Europe's digital agenda, setting the right objectives, implementing an adequate legislative framework to foster investments and competition, so that the ICT sector can contribute to Europe's economic growth and social development.

Contact (for registration - with full name and date of birth) : ALDEdigital@gmail.com

17th International Symposium for Design & Technology in Electronic Packaging, SIITME, 20-23 October 2011, Timisoara, Romania

SIITME is a premier Central EU event in the field of electronics industry, being from 1995 a scientific forum for exchanging of information between academia-industry on the topics related to their experimental and theoretical work in the field of electronics and micro-systems, manufacturing technologies, advanced packaging. The symposium, a top class, four days scientific event, combines the oral and poster presentations, in an attractive configuration, as well as individual meetings between professors, students, senior, young scientists who can discuss scientific, educational issues and organize future national and international cooperation. Presented papers will be included in the ISI data base [IEEE Xplore](#) Digital Library.

More... <http://www.siitme.ro/> ; <http://www.siitme.ro/submission>

22nd EAEEIE Annual Conference, Maribor, Slovenia, June 13-15, 2011

The EAEEIE (EU Association for Education in Electrical and Information Engineering) is a EU non-profit organization, with members from nearly seventy EU Universities, most of them teaching in the area of Electrical & Information Engineering (EIE). The mission of the EAEEIE is to enhance education in EIE through understanding of EU education practices, industry

participation, continuing education, credit transfer in international exchanges, scientific, educational research, to determine criteria to establish standards on EIE education.

The objective of the Conference is to bring together lecturers, researchers, professionals in the field of EIE all over Europe with the aim to exchange ideas, information, contribute to the development of EIE education.

Previously named Index to Scientific & Technical Proceedings® (ISTP), Web of Science Proceedings (WoSP) and ISI Proceedings). The calls for papers are announced for 6 categories papers including following:

- 1) The 22nd DAAAM International Symposium Intelligent Manufacturing & Automation, will be held at Austria Center Vienna, UNO City, Vienna, Austria, 23-26th November 2011. Author can choose between oral and poster presentation of paper. The papers will be published Annals of DAAAM for 2011 & Proceedings of the 22nd International DAAAM Symposium which in CPCI (former ISI) Proceedings! Status: Call for Papers
 - 2) 5th European DAAAM International Young Researchers and Scientists' Conference which will be held parallel to the 22nd DAAAM International Symposium. Author can choose between oral and poster presentation of paper. If you are young researcher or scientist, or you are the supervisor of young researcher or scientist - this is your conference! The papers will be published in CPCI (former ISI) Proceedings! Status: Call for Papers
 - 3) DAAAM International Scientific Book is very successful project. If you want to present your research project, newest results as a chapter of DAAAM International Scientific Book - you are welcome. All book will be crossreferenced, available on internet. At the time the DAAAM Scientific Book in evaluation process at Thomson Scientific for the including in category "cc books". Status: Call for Manuscript.
 - 4) DAAAM International Journal of Simulation Modelling Call: <http://www.ijsimm.com/>
- In the activities are included thousands of people, institutions, publications.

JOB: PhD scholarship in Computer science, 2011-13, Work4lab, Paris

The objective of this thesis is to develop an algorithm for matching between vacancies manual and user data contained on LinkedIn and social networks Facebook. More particularly, the algorithm aims to: Propose jobs most relevant to the profile of a user, Suggest Contacts may be interested in a job given Optimize creative advertising campaigns focused on the Facebook network.

The company Work4 Labs (www.work4labs.com) is an innovative company founded in 2010 whose premises are based in Paris & San Francisco. We develop Facebook applications to help recruiters find candidates. Our flagship application called Work for Us, allows companies to distribute directly their vacancies on their corporate page Facebook, to exploit the largest database in the world. In less than 6 months, more than 4500 customers use our application, 1000 new subscribers every month, among them include L'Oreal, Sodexo, State Street, Accenture, Areva, Deloitte, KPMG, etc.. Candidate requirements: Master in Computer Knowledge in statistics and machine learning is a plus. A first experience in information retrieval would be good. Start: ASAP. Compensation considered: 2000 euros gross Applications should be sent to: adimontagliari@work4labs.com

DERri - Distributed Energy Resources Research Infrastructure

DERRI is a collaborative research project under the EU FP7 programme between 15 partners from 12 countries distributed all over Europe, all partners with exceptional, supplementary research infrastructures, with leading expertise.

In addition to internal Networking Activities and Joint Research Activities, DERRI provides external European research communities the opportunity for transnational access to the DERRI partners research infrastructures.

2nd DERlab PhD and researchers seminar on Distributed Generation and Renewable Energy Sources, University of Strathclyde, UK, 7 April 2011

The DERlab network is organising the 2nd PhD and young researchers seminar in the area of "Distributed Generation and Renewable Energy Sources". We invite you to participate in the event exchanging knowledge and expertise. The seminar is taking place in University of Strathclyde. The event is part of a series of seminars organized by DERlab.

Our Vision: To be the reference-lab in EU for sustainable integration of distributed energy resources into power systems.

Our Mission: Perform tests, pre-competitive and pre-normative research, as well as training activities, supporting the transition towards more decentralised power generation.

Course: Electric Energy Systems University Enterprise Training Partnership, Manchester, UK, 8-10 March 2011

Course on: Protection of Future Networks with Distributed Generation. **Course organiser:** School of Electrical & Electronic Engineering of University of Manchester on behalf of Network of European Distributed Energy Recourses laboratories (DERlab) and Pre- Standardisation

The course is designed to give both, industrial practitioners (technicians, engineers and managers) and young academics and researchers a solid understanding of the Electricity Networks Protection issues and also Advanced Protection of Future Networks with high penetration of Distributed Generation (DG) Sources. **Course objectives:**

- to introduce the classical/advanced operating principles, main features of protection schemes, various types of relays.
- to introduce main principles for protection of systems with high penetration of DG Sources.
- to introduce the advancements based on the use of novel Information and Communication Technologies, satellite synchronisation and communication, advanced Digital Signal Processing Techniques, robust Control algorithms and those protection principles which will be utilised for the protection of future Smart Grids.
- to provide the attendees with the knowledge and practical skills necessary to apply these relays and schemes to the protection of plant and systems including transmission, distribution and industrial networks and rotating machines.

Medical Electronics driving Health Care Evolution

The theme of this all-digital special issue on Medical Electronics is "Electronics at the heart of health care evolution". The report takes a look at the scientific, technological advancements in medical electronics devices for disease prevention, diagnosis, treatment, cure. The report traces developments in chip, module, systems solutions that enable not just medical professionals, but the patients themselves, to prevent disease where possible, diagnose it earlier when it occurs, treat it more effectively. We analyze the market for electronic medical devices, probe the enabling technologies for these devices, such as MEMS, microchips, DSPs, displays, wireless communications.

Introductory & Practitioners Seminar: European Public Procurement Rules, Policy & Practice, 23-25 February 2011 and 21-23 September 2011, Maastricht

EIPA provide a basic introduction to EU Public Procurement for newcomers to procurement or non-procurement persons. The primary aim is to present/explain the EU rules, principles on public procurement in an accessible way, to enhance awareness of professional procurement practices. The seminar will include an interactive workshop with specific cases. And will offer an excellent platform for participants to exchange experiences/concerns in dealing with public procurement.

Course in Statistics for toxicologists; focus on dose response modeling, Stockholm, Sweden, March 21-25, 2011

The objective of the course is to provide knowledge on dose response modelling in toxicology, including benchmark dose analysis, for risk assessment of chemicals. The course is intended for PhD students, post docs, senior scientists and other professionals. Funding for travel, subsistence and course fee is available for PhD students, post docs. **Application deadline is January 21, 2011.** The course is organised by RA-COURSES, a project funded by EU Marie Curie Actions.
