Technology Transfer and Innovation

Events in technology transfer and innovation field

Enterprise Europe Network carries out a variety of events to promote their activities to companies and organisations at regional, national or European level. The events provide you the opportunity to meet potential cooperation partners during pre-arranged face-to-face meetings, to present your business or technology offers.

Do you have technology profiles in the fields? Please contact office@ipacv.ro to support you.

Colloque Impacts de la réglementation sur l'innovation et la mise sur le marché des produits de santé, 28-29 Mai 2013, Parc Biocitech, Romainville, France

La réglementation a pour but de protéger la santé des citoyens tout en harmonisant l'évaluation des produits de santé et en favorisant l'accès pour tous à l'innovation. Comment mettre sur le marché des produits de santé innovants dans un contexte de cascade de textes législatifs et réglementaire et concurrentielle entre les pays ?

Domaines couverts:--- Médicaments, Dispositifs médicaux, Produits de diagnostics, Compléments alimentaires - allégations santé, Cosmétiques, Biocides destinés à l'hygiène humaine.

Comment réglementer dans un contexte scientifique et technique en perpétuelle évolution ?, sous l'influence des différents acteurs sociaux ?, devant l'émergence de produits frontières ?

Comment innover dans un contexte où l'évolution des sciences et techniques et le principe de précaution entraînent un renforcement permanent des exigences réglementaires ?, dans un cadre réglementaire contraignant ou insuffisant ?, en utilisant la réglementation comme levier de différenciation-?

Les sujets abordés s'appliqueront aux produits de santé comme les médicaments, les dispositifs médicaux, produits de diagnostic, compléments alimentaires, produits alimentaires avec allégations de santé, cosmétiques, biocides destinés à l'hygiène. La manifestation est destinée aux acteurs publics, chercheurs, institutionnels chargés de la politique de santé publique, experts scientifiques/privés, responsables affaires réglementaires, R&D, production, contrôle qualité, marketing stratégique, impliqués dans l'innovation/l'évolution de la réglementation des produits de santé.

Trade mission Market Visit to Belgium, 5-7 November 2013

In the third quarter of 2012 one tenth of the total value of England's exports to Belgium (approx. 2,3 million) was from the East Midlands region. That does not come as a surprise- a company located in Belgium has access to 20 million consumers within a 500km radius. Therefore, a trade mission is taking place to help you access, explore this vast consumer market. Aside from being a top business location in general, the Brussels-Capital Region is also home to food and drink, healthcare and ICT. Belgium is also one of the top three countries in terms of innovative enterprises.

http://europa.eu/rapid/press-release_STAT-13-5_en.htm?locale=eno

Trade missions provide companies with an inexpensive, convenient, low risk opportunity to visit a market and with the reassurance/prestige of going with a group.-Enterprise Europe Network will help businesses reap maximum rewards by identifying relevant contacts and business opportunities. Please have a look at http://www.een-midlands.org.uk/documents/content/events/belgium_fact_sheet_low_res.pdf to see what the Belgian market has to offer. This event will be launched during a Breakfast Meeting on 14 June

<http://www.een-midlands.org.uk/events/default.aspx?section=16&item=182&month=6&year=2013>.

Clusters

Cluster Observatory

The [Cluster Observatory](http://www.clusterobservatory.eu) is an **online platform that provides a single access point to information and analysis of clusters and cluster policy in Europe**. Born in 2007, the Observatory is now offering a range of new services, as it provides data and analysis on clusters and competitiveness, a cluster library, a cluster wiki and a classroom for cluster education. The Cluster Observatory also produces analysis and reports on regional competitiveness conditions, transnational cluster networks, clusters in emerging industries, and studies on better practices in cluster organisations.

Next Celtic-Plus the EUREKA cluster for telecommunications - Spring's call deadline April 23, 2013

Celtic-Plus, the EUREKA cluster for telecommunications, mobile, Internet technologies continues its successful launch of high-tech projects with a new call - projects applying for public funding are to be submitted before April 23, 2013.-

The expected total budget for this year's calls organised by <http://www.eurekanetwork.org/celtic/> is of 100 M, is to be awarded to a few innovation projects in the technological area covered by the cluster. A selection of possible research topics can be found on the <http://www.celticplus.eu/Project-calls/Research-areas.asp> Celtic-Plus website, however, project ideas generated from the bottom-up in other research areas can be proposed.

Only fully defined proposals are accepted in the submission process. The deadline of the second call for projects to take place this Autumn will be October 15, 2013.

More... http://www.eurekanetwork.org/showarticle?p_r_p_564233524_articleId=1971689&p_r_p_564233524_groupId=10137 ; [Call-2013 page](#) ; [Find-a-Partner page](#)

Clusters, Financing Research Development Projects, Seminar, 8-April, Berlin, Germany

The separation of economic, non-economic activities for universities research organisations in the EU that receive public funding is obligatory. The EC applies specific criteria to evaluate the State aid character of public funding for universities research organisations. The criteria are defined in the community framework for State aid for research, development and innovation (R&D&I). The financial accounting, reporting of projects funded by FP7, ERDF, including INTERREG, ESF, CIP are considered very time consuming, complex. Many universities research institutions use therefore full costing as it is a perfect tool for separating economic and non-economic activities.

Patent Information News 1/2013 published

Patent Information News is a quarterly publication that informs EU patent information users of new developments in the area. EPO first issue looks at the Cooperative Patent Classification (CPC) system, created together with the USPTO, which entered into force

on 1 January. It also contains news of new links between Espacenet and patent registers maintained by national offices.

Decentralized Training in advanced international IP-Management, Umea, Sweden, 18-19 June 2013

This training is for you that already have a basic knowledge about Patents, Trademarks, Design protection. Focus:

- Valuation, different approaches
- Components in IP-Management
- Enforcement and cost/risk management
- Management in EU-funded projects
- Open Innovation and IP
- Public IP-support structures for SMEs

There will be two valuable days to improve your skills in the field of IP-Management, especially when combining different tools to achieve maximum protection for our clients in business, technology transfer and research cross borders.
More... AGENDA; <http://www.anpdm.com/newsletterweb/41465C417147445E4472454559/41415D4A78464250447740475943>

Commercialising Intellectual Property: Joint Ventures

“Commercialising IP” is a series of fact sheets aiming to provide an introduction to the forms of commercialisation that can be useful for less advanced public likely to be involved in exploitation of intangible assets. Content provided therein is not intended to be exhaustive and professional advice is strongly recommended when it comes to choose the most suitable commercialisation practice to your organisation.

The fact sheet focuses on joint ventures (JV) and will put forward some practical and legal issues, mainly from the perspective of the ownership and exploitation of IP, to be considered at all stages of these projects.

More... http://www.iprhelpdesk.eu/sites/default/files/newsdocuments/Commercialising_Intellectual_Property_Joint_Ventures_0.pdf

European patents and the grant procedure What is a patent?

Patents confer the right to prevent third parties from exploiting an invention for commercial purposes without authorisation. In return for this period of protection, applicants must fully disclose their invention.

What is an invention? An invention can be, for example, a product, a process or an apparatus. To be patentable, it must be new, industrially applicable and involve an inventive step.

What are the advantages of a European patent? The EU Patent Convention makes it possible to obtain patent protection in about 4EU countries on the basis of a single application

How do you get a European patent? All the contracting states to the EU Patent Convention offer the possibility, as a first step, of applying for a national patent. Filing an application with a national patent office has the advantage that entry to the procedure is relatively cheap, that applicants can deal with a patent authority in their own language. If they decide that they also need protection in other countries, they have twelve months from the date of first filing to file applications for the same invention elsewhere. They can claim the priority of the date of first filing for such subsequent applications.

More... [http://documents.epo.org/projects/babylon/eponet.nsf/0/e6ce616afb87afac125773b004b93b5/\\$FILE/EPO_EuroPatente10_en.pdf](http://documents.epo.org/projects/babylon/eponet.nsf/0/e6ce616afb87afac125773b004b93b5/$FILE/EPO_EuroPatente10_en.pdf)

Research

What are the benefits of participating in EU research projects?

The biggest benefit that I see in the European research programs is the ability for people from different countries to get to know each other and work together on projects, because learning what is going on in other places and being exposed to other thoughts is really important and I think here EU has a real advantage, because the culture that's developed in these different places means people think a little bit differently from one another, if they can learn to talk together and develop products together, innovations together, there's a true added value here that I don't see in more homogenous societies.

More... http://ec.europa.eu/research/horizon2020/index_en.cfm?pg=testimonials&video=andrew-nash-4

As a company, we get connected to other industry partners, but also research institutes and universities. And really, it is quite the whole community that comes together and works on the topics together.

More... http://ec.europa.eu/research/horizon2020/index_en.cfm?pg=testimonials&video=maria-goleva-4

Annual Progress Report on the activities of the Joint Technology Initiatives Joint Undertakings (JTI JUs)

The Joint Technology Initiatives are a novel way of forming public-private partnerships in industrial research at EU level. They were set up as pilots under the FP7 in five strategic areas: aeronautics and air transport (the Clean Sky initiative), public health (the Innovative Medicines Initiative (IMI)), fuel cell and hydrogen technologies (the Fuel Cells Hydrogen (FCH) initiative), embedded computing systems (the ARTEMIS initiative), nanoelectronics (the ENIAC initiative).

The SESAR (Single EU Sky Air Traffic Management Research) programme should also be mentioned since it is funded under the FP7. Bringing together industry, research community, regulators, EU to define common research agendas, invest in large-scale multinational research activities, the JTIs represent an intriguing opportunity, in a global economic downturn, for EU to strengthen its competitiveness based on the principles of scientific excellence, openness, innovation. This report shall contain details of implementation including number of proposals submitted, number of proposals selected for funding, type of participants, including SMEs, and country statistics.

Innovation and Entrepreneurship

Process of Innovation Within Human Resources

The process of innovation is something that each company must ponder. It takes a team of creative individuals to figure something unique that will enhance the internals of a company. When it comes to innovative human resource management, there must be a change in the way someone hires talent out there.

Sometimes it will require hiring people that are not normally seen as a fit for the company. Companies must look past the appearance of an individual and whether or not they look the part for the job. It is a great way to encourage [innovative human resource management](#) by allowing people who normally would not fit in a business model to work of a company. A company will be able to get more done by expanding their worker pool and help people get access to quality jobs.

State of the Innovation Union 2012 accelerating change

Communication from the Commission to the EU Parliament the Council on the State of the Innovation Union including the establishment of a new EU 2020 innovation headline indicator, the mainstreaming of innovation across EU policies.

The Commission will provide a short update on the state of the Union while setting out two strategic initiatives, namely:

- A. The development of a new Europe 2020 headline indicator.
- B. The development of an innovation mainstreaming strategy to bring innovation to EU policies,

It takes into account both the recent EU study the costs of non-innovative Europe which encourages 'to go beyond the traditional limits of national and EU R&D policy', the OECD Innovation Strategy (2010)'s supporting analysis which emphasizes those policy actions that can help innovation without requiring additional/significant public investment.

I3S, the European Commission platform for all Innovation Union stakeholders

I3S, the Innovation Union Information Intelligence System, is the EC platform for all Innovation Union stakeholders. Its principal aim is to ensure that all stakeholders are well informed on the implementation of [Innovation Union](#). It provides easy access to up to date, comprehensive, comparable information on the implementation of all 34 of the Innovation Union Commitments presented in the Commission's Innovation Union communication of October 2010.

The system provides more detailed background intelligence information relating to each commitment. This facilitates further exploration of the key issues addressed, provides additional supporting data/analytical perspectives. For each of the 34 Commitments, a dedicated section of this site sets out

- the key dimensions of challenges faced
- the objectives in tackling these challenges
- the approach planned to meet these challenges
- key milestones along the way are presented, highlighting the achievements made, specific events, publications, other activities planned.

Guide on regional/national Research and Innovation Strategies for Smart Specialisation (RIS)

This guide is targeted at Structural Funds Managing Authorities, policy-makers and regional development professionals.- It sets out the concept of smart specialisation and provides orientations on how to develop research and innovation strategies for smart specialisation (RIS3). Guidance is structured around a 6 practical steps:

- Analysing the innovation potential
- Setting out the RIS3 process and governance
- Developing a shared vision
- Identifying the priorities
- Defining an action plan with a coherent policy mix
- Monitoring and evaluating

For a short overview see the [fact-sheet](#). The guide also presents in a compact form some main delivery instruments that could be used to implement smart specialisation strategies, cluster support, university-enterprise cooperation, SME innovation support, centres of competence research infrastructures, public procurement of innovation etc.

Some of these policy tools, challenges related to RIS3 are further explained in thematic [guides](#).

Smart Specialisation Strategies in Romania & Regional Development Policy Beyond 2014, 2 April 2013, Timisoara, Romania

The Smart Specialisation Platform is pleased to announce this event on Smart Specialisation and Regional Policy in Romania. The seminar is co-organized by the West Regional Development Agency and the European Commission.

More... The agenda can be found [here](#).

Regional Innovation Fair InnoMatch, 3-4 April 2013 Arad, West Region Romania

The event is organized by West Regional Development Agency and Tehimpuls Regional Innovation and Technology Transfer Centre, in partnership with Fraunhofer Institute for Manufacturing, Engineering and Automation.

The InnoMatchRegional Innovation Fair will benefit from the presence of World Bank, European Commission and Smart Specialisation Platform representatives, and will provide an exchange platform for a wide range of regional, national and international partners coming from ministries, companies, universities, RTDI organizations, public administrations and other innovation stakeholders. Moreover, it will bring to the scene a mix of exhibition stands, thematic panels, matchmaking sessions, presentations of good practices and an awards ceremony for the most innovative solutions showcased. Please consult the preliminary agenda of the event [here](#)

Europe 2020, Regional Innovation Strategies future funding opportunities, 17 April 2013, Brussels

The EC's DG for Enterprise Industry, RIM Plus, Europe202Regions, ERRIN Network are glad to invite you to a joint RIM Plus and Europe202Regions Policy Workshop. The event will open a timely discussion on European and regional innovation policy as Europe moves to new funding opportunities in Horizon 202 and Cohesion Policy in 2014. It will also be an excellent opportunity to learn how the RIM Plus activities can support effective regional innovation policy.

This workshop is a chance for all regional practitioners involved in the development and implementation of research and innovation smart specialisation and the Europe 202Strategy to share experiences and discuss specific challenges they face:- ranging from assessing and defining areas of smart specialisation, putting an entrepreneurial discovery process in motion, and defining cross-border innovation policies, to monitoring and evaluating regional innovation policies, or designing new policies about collective intelligence innovation.

S3 Peer Review Workshop'Stakeholder Engagement the RIS3 Governance', Vaasa, Finland, 14-15 May 2013

Building on the experience gained from the previous seven peer-review workshops organized by the S3 Platform, this workshop will employ the peer-review methodology as an instrument to support EU regions and Member States in the development of their RIS3 (research and innovation strategies for smart specialisation).The four European regions Ostrobothnia (FI), Langedoc-Roussillon (FR), Lubelskie (PO), Piemonte (IT) will present their current work on RIS3. The

rest of the workshop participants will be asked to act as 'critical friends' and discuss the strategies of the four regions under review. The peer review sessions are an excellent opportunity to discuss RIS3 strategies with other regions and experts. Please read more about the S3 peer review methodology [here](#).

More... <http://s3platform.jrc.ec.europa.eu/8th-peer-review-14-15may>

Universities and Smart Specialisation

The S3 Platform for Innovation Union stakeholders is pleased to announce the launch of a new theme on the role of universities in smart specialisation, in cooperation with the European University Association. This will include workshops and a stakeholder conference as well as research activities. A dedicated page will be available soon, but in the meantime interested S3 Platform members are invited to contact jrc-ipts-s3platform@ec.europa.eu for more information.

Training Workshop on Smart Specialisation for South East EU countries, Belgrade, Serbia, April 11-12, 2013

The workshop is all-inclusive both for Western Balkan & Danube region's countries. It is a combination of training on smart specialisation basic concepts, practice evolving around the presentation of the Platform & Guide on smart specialisation that the Joint Research Centre - Institute for Prospective Technological Studies, IPTS has launched. National/Regional Research & Innovation Strategies for Smart Specialisation (RIS3 strategies) are integrated, place-based economic transformation agendas.

The concept: http://ec.europa.eu/regional_policy/sources/docgener/informat/2014/smart_specialisation_en.pdf

Partner Search from Norway for Romania Norway Funding Programme

The Young Entrepreneurs Association from Romania YEAR, is the only employer NGO in Romania that represents at national level the interests of young entrepreneurs. YEAR aims to support, defend, promote and represent the professional, economic and social interests of young entrepreneurs in Romania, by supporting, defending, promoting their investments, the business entity (company, family business) they established.

Our organization is currently implementing various projects aiming at providing entrepreneurial education to the Romanian youth, improving youth employability, self-employability, facilitating the transition from school to work, promoting equal opportunities in the job-market etc.

Taking into consideration the above-mentioned priorities, the YEAR expresses its interest in accessing the EEA/Norway Grants, financial assistance that also covers our areas of interest entrepreneurship, employability improvement and green entrepreneurship. In this respect, we are looking for potential Norwegian partners for YEARs projects or for the projects of our members. We are especially aiming at creating partnerships with:

NGOs, other organizations, enterprises active in the area of entrepreneurship and employment services.
Enterprises engaged within the green economy.

EUREKA-Programmes

INDIVIDUAL PROJECTS - the most common EUREKA-funding tool. It is used for high-technology market oriented R&D projects aiming at developing a cutting edge civilian product, process or service and must involve partners from at least two EUREKA member countries

EUROSTARS - an European research and development programme targeting small and medium enterprises. It can address any technological area but must have a civilian purpose and be aimed at the development of a new product, process or service.

CLUSTERS - longer term strategically significant industrial initiatives. They have a large number of participants, and aim to develop generic technologies of key importance for European competitiveness.

UMBRELLAS - thematic networks focusing on a specific technology area or business sector. Their main goal is to facilitate the generation of EUREKA-projects in its own target area.

Policy

What is needed to exit the crisis and help Europe's economy to grow?

We need one strategy, rather than 27 strategies...plus the World Bank, plus the something bank, plus the something else, plus somebody else...We need to get agreement, as fast as possible, on what is A single European strategy and somehow, to get some confidence back. Talking simply for the UK, banks are not short of money but they're not lending it and business wants cash to invest, to expand but everyone is lacking confidence, so it's the classic stalemate, people sit and look at each other and say well you go first no, you go first...

More... http://ec.europa.eu/research/horizon2020/index_en.cfm?pg=testimonials&video=eric-sampson-2

Education is the start of everything. So we should have very good educated people in Europe. I think some countries are doing really well, some are doing less...but I think that's a start, because if you have the knowledge, you have the tools available to get out of the crisis.

More... http://ec.europa.eu/research/horizon2020/index_en.cfm?pg=testimonials&video=coen-bresser-2

I think one big problem that we have is how the politicians are trying to save us from the crisis and also I think that, I'm a researcher, but I think as well that if we use more money to improve our research and if we try to find something new to move the market it could be a solution...And forget about giving money to the banks... totally!

More... http://ec.europa.eu/research/horizon2020/index_en.cfm?pg=testimonials&video=maider-larburu-2

As a developer, or technician I would say that it's...uh what we need is that the politicians listen a bit more to the technicians or to developers when they put in place the different programs research programs or competitiveness programs for next years. Because I think we know what we have to do sell better products in Europe and other countries in the world and I think they don't take the time to really listen to our solutions.

More... http://ec.europa.eu/research/horizon2020/index_en.cfm?pg=testimonials&video=andre-perpey-2

Learn how Scotland is using smart technology to harness its renewable power potential

Solving demand by merely building more power plants is no longer an option. Instead, the emphasis is on generating cleaner power as well as using less power altogether. As the existing Electric Grid moves toward clean energy, a smart grid will become essential to controlling the flow of energy. At the same time, the inability of the current electric grid to store energy is creating huge gaps and inefficiencies.

European Parliament calls on the Commission to assess a binding 2030 renewable energy target

The Industry, Transport, Research and Energy (ITRE) Committee of the European Parliament has adopted the Reul report today, which calls on the EC to assess a mandatory 2030 renewable energy target. The European Parliament calls for post-2020 renewable energy policies and targets to be set on the road towards 2050. This resonates with ERECs proposed 45% renewable energy target by 2030, said EREC president Rainer Hinrichs-Rahlwes.

This is a key message from the European Parliament to the EC a few weeks before publication of its Green Paper on a 2030 policy framework for climate energy. The report reinforces the position taken by the European Parliament in a report on the 2050 Energy Roadmap that the successful 2020 renewable energy targets should be prolonged to 2030.

Events

The AcademiaPharma Development Partnerships Summit, 22 May 2013, London, UK

The only event in Europe that highlights the benefits potential challenges of collaborations between academic institutions, pharma/biotech companies. As more alliances are being announced in discovery, clinical development how can your organisation capitalise on this most effectively, play a key role in the next phase of drug breakthroughs?

Are you an academic seeking funding partners? Are you from industry, seeking to partner with academia? Join your peers in partnering with Industry Job Functions:

- Research Development
- Finance Venture Capital; Licensing
- Drug Discovery
- Clinical Research
- Regulatory Affairs Drug Development
- Outsourcing

The event will discuss the future direction of biomedical research and the urgent changes needed to realise the full potential. The speech will include a scrutinising review of the way our research infrastructure and partnerships currently work and how information is shared, will draw upon experiences, cases outside of the UK to provoke thought and discussion on how we can learn from successful partnership models in the US.

Transport and Energy Management Conference, 1 April, Brussels

WhereCEN-CENELEC Management Centre, Brussels. Participation free of charge - registration required

The conference is designed in particular for companies and experts interested in new technologies, supply chain, logistics, transport best practices, evaluation and management process.

The aim of the conference is to present some of the activities already carried out and to create an exchange of views with stakeholders (industry, EC, environmental NGOs) in order to identify possible needs for further standardization. The conference will give an insight into two standards recently published: Energy meters and Methodology for calculation of

energy consumption. In the afternoon, we will hold two optional parallel sessions in order to:

- gather feedback from interested parties on the draft European Standard on energy audits in transport being developed by CEN/CLC JWG 1 Energy audits;
- learn about the challenge of putting standards into practice in the area of intermodal transport.

5th International Conference Exhibition for the Organic Printed Electronics Industry LOPE-C, 11-13 June 2013, Messe Munchen, Germany

LOPE-C is the largest/most comprehensive business technical conference industrial showcase worldwide, dedicated to a rapid progress in the field of organic/printed electronics. Record participation in 201218conference presentations from 27 countries. Please use the following links for the different conferences

- | | | |
|---|--|---------------------------------------|
| • Plenary Session | • Technical Conference | • Business Conference |
| • Scientific Conference | • Short Courses | • Investor Forum |

TPM and Similar Systems in Practice Conference, 24-26 September 2013, Budapest, Hungary

The Conference focuses on the practical implementation, improvement of productivity improvement methodologies TPM (Total Productive Maintenance Manufacturing Management), their role in industrial maintenance/ production.

The Conference will provide excellent opportunities to learn about the recent developments of TPM, to exchange experience and best practices. We are expecting participants from all around the world so the Conference also provides a full scale view on the topic not to mention it is also a great networking opportunity.

3rd Symposium Small PV Applications - Rural Electrification Commercial Use, Ulm, Germany, June 17-18, 2013

Hybrid systems, mini-grids with PV generators and grid-connected solar systems are well covered in numerous other international conferences - making the Small PV Symposium a specialized niche conference explicitly focused on all types of small off-grid PV applications (with typical sizes from 1-5 Wp for solar lanterns to 10-10kWp for some industrial applications). This is by far the largest segment of the total PV off-grid market. Symposium focus:

- Description of existing markets and state of art technology
- Open discussion of good and of bad examples of systems and distribution strategies
- Development of a vision for small PV-applications, their technologies and markets

3rd Low Carbon Earth Summit-2013, September 26-28, 2013, Xian, China

The Summit are organized under the theme Breathing New Life into Green Challenges. As one of the leading conferences for low carbon economy, technology, development, partnering, LCES-2013 has been promoted to a Key National Strategic Meeting Platform in China. LCES-2013 will once again bring together thought leaders from emission trade, financial investment companies, regulatory authorities, well-known industry experts, innovative technology developers, scientists who will present the latest research results, ideas, developments, applications, business prospects in Low Carbon Industries Technologies, Green Auto, Low-Carbon Power Generation, Smart City Low Carbon Architecture.

Training Events / Jobs

Calendar of training courses in nanoscience and electronics

- 12 Apr [Electron Microscopy: New Applications in Micro and Nanotechnology](#) Switzerland
- 15 Apr [University of Oxford: Online Introduction to Electronics](#) Online
- 16 Apr [Workshop on Advances in Analog Circuit Design](#) France
- 16 Apr [Polymer Microfabrication](#) Germany
- 22 Apr [Advanced Course on Image Sensor Technology](#) Germany
- 22 Apr [Power Integrity: Advanced Design and Characterization](#) Germany
- 22 Apr [Digital Signal Analysis Techniques: Time, Frequency, and Spatial Algorithms](#) Germany
- 22 Apr [Smart Materials in Robotics and Microtechnology](#) Switzerland
- 22 Apr [Smart Sensor System Course 2013](#) The Netherlands
- 22 Apr [Fiber Optic Transmission Systems](#) Germany
- 22 Apr [Advanced Radio System Architectures](#) Germany
- 29 Apr [RF Analysis with Virtuoso Spectre Simulator vMMSIM.7.2](#) UK
- 06 May [Advanced Signoff Power-Grid Analysis with Encounter Power System v8.1](#) Germany
- 11 May [Advanced Digital Physical implementation flow](#) Belgium
- 13 May [Nanoscale CMOS Process Technology](#) Belgium
- 13 May [Thin Film Deposition at the Nanoscale: Mechanisms and Applications](#) Sweden

Training course Introduction to the IMProve Approach, Duesseldorf, Germany, June 11-12, 2013

Convincing -small medium sized enterprises to use external support to improve their competitiveness is a challenge. However, if you can demonstrate that your support services create sustainable impact they will be interested. With the IMProve Assessment, the EU Approach to Innovation Management, you will be able to provide your clients with international/national benchmarks from their competitor in a structured, most time efficient manner. By completing the IMProve Assessment with your support you can guide your client from structured benchmarks to insights, then to clear recommendations for profitable growth of your client. To learn about the IMProve Assessment, we invite to the training.

Professional Certificate in Strategic Sustainable Energy Planning, 15-18 April 2013, London, UK

If you wish to attend this certificated programme please <http://parliamentarystudies.org.uk/O8S-1CLPN-58P6RI-JAL4L-1/c.aspx> register online now to secure your delegate place(s). With a focus on energy models, technology transfer, renewable energy sources, this programme provides participants with an understanding of the sources of sustainable energy, technological developments, develops techniques to integrate the knowledge with strategic energy plans to facilitate a sustainable future. The certificate is accredited by the Chartered Management Institute, the leading body that awards internationally recognised management, leadership qualifications.
